

Repeal HB 6

It has been almost three months since Speaker of the House Larry Householder and his cohorts were arrested on bribery charges....almost three months, and still no action has been taken by the Ohio House to repeal HB6! He has been accused of being the lynchpin in the bribery scandal that has been described as the largest in Ohio history, he is still seated as a Representative of the people of House District 72, he is running for re-election, and the House of Representatives has not taken action to remove him from the House....and it has been almost three months, and still no action has been taken by the Ohio House to repeal HB 6! After the arrest of Speaker Householder in July, the citizens of Ohio finally had some firm evidence of what a corrupt piece of legislation HB 6 is; something that many knew before HB 6 was passed....and still after almost three months, no action has been taken by the House to repeal HB 6!

I believe that at this point in time, no matter what your beliefs are on renewable energy, energy efficiency, nuclear energy, and climate change, that any Ohio lawmaker who has not pushed to repeal HB 6 by now is complicit in betrayal of the public trust to which they were sworn to uphold when they took an oath of office. No matter if you have a D, I, or R beside your name, conservative, moderate, or liberal in your thinking, the citizens of Ohio should be able to agree that this is not right. The citizens of Ohio need to speak out loudly that this fraudulently passed piece of legislation needs to be repealed immediately!
