

## **Subject : HB 6 Repeal**

Message :

I support the complete repeal of HB 6. Responsible development of renewable energy is necessary, goals must be set and met to the best of our ability. As a member of Canton Audubon Society, many within the organization have echoed this.

The massive payoffs that led to the passage of HB6 is a stain on the Ohio legislature and everyone involved with this bill. Adding insult to injury, this same body of women and men expect Ohioans to pay for out-of-state residents.

I do not understand why our officials are opposed to new sources of energy. We no longer forage for sticks and branches or shovel coal into furnaces to cook and heat our homes. Why? Because new, modern sources became available to us. We changed and adapted, we (and business) will adapt again.

The citizens of Ohio should expect more out of our legislators than rather than kowtowing to special interests while lining their pockets.

It's time to move forward.

Linda Chen
