

My name is Dennis Helmuth. I live in Wooster, Ohio and I have been an Ohio resident for all of my 64 years. The way the current Ohio legislature kowtows to the fossil fuel industry disgusts me. Even before the revelations about House Bill 6 it was evident that many Ohio law makers were in the pocket of dirty energy. For example establishing the \$100 per year surcharge on the registration of hybrid and electric cars. You actually had the nerve to punish citizens for owning a cleaner energy vehicle. That's despicable. Now that everyone knows the extent of the corruption surrounding House Bill 6, the least you can do is repeal it. Get back to Columbus and do your job. Repeal House Bill 6! And while you're at it, repeal the punitive surcharge on clean energy vehicles.

Thank you.
