Repeal HB6 and Restore Innovation for Our Future

Congregation Beth Adam's core values are based upon human dignity and ethical behavior. We are committed to repair of the world through responsible actions that value each other and our planet. It is because of these values we are pleased to hear and fully support Governor DeWine's call for the repeal of HB 6. But we caution that it not be hastily replaced without consideration of the effects on the environment, human health and innovation.

HB 6 put the short term interests of power utilities before the interests of Ohioans. At Congregation Beth Adam we take seriously our responsibility to repair and improve the environment. Short term interests should never be given priority over the safety, health and security of our children's future.
