

My name is Alicia Webb - I am writing to you today to oppose & voice my concerns around the content of SCR10. I am very concerned with the proposed OAC 3701-36-05 for these reasons -

I find it unethical and inappropriate to use money to punish County health departments whose citizens decline a medical product - and I would like to emphasize a pharmaceutical product that has zero liability from its manufacturers.

These leads me to my next point. Government should NOT be using financial incentives - to push pharmaceutical products - that again have zero liability.

I am fully against public posting of vaccine product consumption rates - b/c this has no weight on actual true immunization rates. Vaccination does NOT equate immunization, you can be vaccinated and your body doesn't create immunity.

I understand that this proposed rule went through the approval process & I regrettably was NOT aware of the language changes at that time. I respectfully request that you vote No on SCR10.

Sincerely,

Alicia Webb
