

Dear Sir:

What can we do to protect our communities from pollution?

Corporate donations drive elections.

In our county we are being sacrificed as a dumping ground for toxic fracking waste from other states, because their laws are more protective than Ohio's. We are powerless to correct this!

Americans must keep their right to non-violently protest harmful actions.

Climate change is a permanent emergency which those in power prefer to ignore.

My representatives in Columbus do not represent me or my interests.

This bill destroys democracy.

Please make it go away.

Yours sincerely,

Alexa Ross
