

Senator,

I hope that you will consider SB#33 redundant because it is. We already have such laws.

In addition, I would like to point out that when I have been involved in anti-fracturing protests, more than a few, I have never been with people who did harm or destruction. Our goal: to raise awareness to the grave dangers that the general public willfully stays ignorant of and ODNR continues to ignore. Simple.

Please vote no on this bill; it is redundant and unnecessary. Thank you, mwn
