I here because I want to make sure that SB 3 is supporting people in their recovery. I have seen first hand the overdose crisis among my friends. The criminalization of drugs pushes people into the shadows, and away from the help they need. SB 3 needs to not only make F4 and F5 drug felonies reclassified as misdemeanors, this needs to be retroactive so that my friends are able to get jobs. The probation to prison pipeline needs to be broken, all people on probation need to be supported, not under severe supervision. The savings need to be redirected back into our communities so that we can actually have the resources to heal.
