

**Dave Greenspan**  
**Special Projects Liaison to the Chief of Staff**  
**The MetroHealth System**  
**HB 212 -Proponent Testimony**  
**House Families, Aging, and Human Services Committee**

Chair Manchester, Vice Chair Cutrona, Ranking Member Liston, and members of the House Families, Aging and Human Services Committee - thank you for providing The MetroHealth System the opportunity to provide testimony today House Bill 212. This legislation extends the Children with Medical Handicaps (CMH) Program age limit from 21 to 26.

My name is Dave Greenspan and I am the Special Projects Liaison to the Chief of Staff at The MetroHealth System. We are the safety-net health system for Cuyahoga County, caring for the most under resourced members of our community. MetroHealth's more than 7,800 employees provide care at four hospitals, four emergency departments, more than 20 health centers and 40 additional sites throughout Northeast Ohio. In the past year, MetroHealth has served 300,000 patients at more than 1.4 million visits. Seventy-five percent of our patients are uninsured or covered by Medicare or Medicaid.

As outlined in the HB 212 LSC Analysis – this bill requires the Director of Health to increase the maximum age of CMH participants by establishing eligibility requirements that progressively increase the maximum age of an individual that can be served by the program. Every year on the first day of July from 2022 to 2026, the Director's regulations must increase the age limit by one year. The final increase, on July 1, 2026, allows individuals under the age of 26 to participate. This annual increase applies to all three components of the CMH Program.

The MetroHealth System supports HB 212.

Chair Manchester, Vice Chair Cutrona, Ranking Member Liston, and members of the House Families, Aging and Human Services Committee - thank you for providing me the opportunity to provide proponent testimony on House Bill 212.

I'll be happy to answer any questions the committee may have. Thank you.

## About The MetroHealth System

The MetroHealth System is redefining health care by going beyond medical treatment to improve the foundations of community health and well-being: affordable housing, a cleaner environment, economic opportunity and access to fresh food, convenient transportation, legal help and other services. The system strives to become as good at preventing disease as it is at treating it.

The system's more than 600 doctors, 1,700 nurses and 7,800 employees go to work each day with a mission of service, to their patients and to the community. As Cuyahoga County's safety-net health system, MetroHealth plays an essential role in the region, caring for anyone and everyone, regardless of an ability to pay.

Founded in 1837, MetroHealth operates four hospitals, four emergency departments and more than 20 health centers and 40 additional sites throughout Cuyahoga County. The system serves more than 300,000 patients, two-thirds of whom are uninsured or covered by Medicare or Medicaid.

MetroHealth is home to Cuyahoga County's most experienced Level I Adult Trauma Center, verified since 1992, and Ohio's only adult and pediatric trauma and burn center.

As an academic medical center, MetroHealth is committed to research and to teaching and training tomorrow's caregivers. Each active staff physician holds a faculty appointment at Case Western Reserve University School of Medicine. Its main campus hospital houses the Cleveland Metropolitan School District's Lincoln-West School of Science & Health, the only high school in America located inside a hospital.

Knowing that good health is about much more than good medical care, MetroHealth has launched the Institute for H.O.P.E.™ (Health, Opportunity, Partnership, Empowerment), which uses a coordinated, collaborative and strategic approach to help patients with non-medical needs such as healthy food, stable housing and job training.

The MetroHealth Glick Center, a new 11-floor hospital, is under construction on the system's main campus in Cleveland and is scheduled to welcome its first patients in October 2022. The billion-dollar project is the cornerstone of a wider neighborhood revitalization effort led by the system and its partners in the community.
