Susan Manchester, Chair  
Ohio House Families, Aging and Human Services Committee  
Ohio House of Representatives  
77 South High Street  
Columbus, Ohio 43215

Dear Chairwoman Manchester, Vice Chair Cutrona and Ranking Member Denson,

My name is Leslie Applegate and I am a practicing internal medicine and pediatrics physician. I have over 7 years' experience in caring for patients and am currently licensed to practice in Ohio.

The Ohio General Assembly should leave the practice of medicine to licensed healthcare providers. I am gravely concerned that HB454 sets a dangerous precedent by interfering with medical decision making and parent/caregiver autonomy to discuss care options in consultation with their child's medical provider.

As I practice medicine, I perform a thorough evaluation on each patient and make treatment recommendations based on the best available evidence for that individual's situation. In my experience, parents/caregivers do the best they can, often in difficult circumstances, to make decisions they believe are in their child's best interest. An example of this is deciding whether chemotherapy or radiation therapies are appropriate for their child.

HB454 would place medical professionals in an ethical dilemma: we would have to refrain from providing evidence-based care to patients struggling with a diagnosis of gender dysphoria or lose our medical license. **I cannot imagine another diagnosis where a state law would prohibit us from delivering evidence-based care.**

In a time when the demand for child and adolescent mental health care is at its highest, HB454 makes the demand even higher. I address patients' mental health every day. I see patients in my clinic frequently who are struggling with anxiety or depression and have difficulty accessing quality counseling and psychiatric services due to fragmented systems and poor insurance coverage. I was trained to treat the whole child; ignoring a child's mental health or a diagnosis like gender dysphoria is simply not responsible care.

I implore you to vote no on HB454. This bill sets a dangerous precedent.

Sincerely,

Leslie R. Applegate, MD
