Susan Manchester, Chair
Ohio House Families, Aging and Human Services Committee
Ohio House of Representatives
77 South High Street
Columbus, Ohio 43215

Dear Chairwoman Manchester, Vice Chair Cutrona and Ranking Member Denson,

My name is Adam Vukovic, MD, MEd and I am a practicing pediatric emergency medicine physician. I have over 13 years' experience in caring for patients and am currently licensed to practice in Ohio.

The Ohio General Assembly should leave the practice of medicine to licensed healthcare providers. I am gravely concerned that HB454 sets a dangerous precedent by interfering with medical decision making and parent/caregiver autonomy to discuss care options in consultation with their child's medical provider.

As I practice medicine, I perform a thorough evaluation on each patient and make treatment recommendations based on the best available evidence for that individual's situation. In my experience, parents/caregivers do the best they can, often in difficult circumstances, to make decisions they believe are in their child's best interest. An example of this is whether or not to perform radiation-based imaging on a child to help recognize surgically-important injuries in their brain or torso.

HB454 would place medical professionals in an ethical dilemma: we would have to refrain from providing evidence-based care to patients struggling with a diagnosis of gender dysphoria or lose our medical license. **I cannot imagine another diagnosis where a state law would prohibit us from delivering evidence-based care.**

In a time when the demand for child and adolescent mental health care is at its highest, HB454 makes the demand even higher. I address patients' mental health every day. We consistently see patients in our emergency department related to mental health concerns and are continually holding them in our department in excess of 24 hours because there are not enough inpatient psychiatric beds to meet the needs of these patients. I was trained to treat the whole child; ignoring a child's mental health or a diagnosis like gender dysphoria is simply not responsible care.

I implore you to vote no on HB454. This bill sets a dangerous precedent.

Sincerely,

Adam Vukovic, MD, MEd
