

Testimony on HCR6

I want to implore you Republicans to remember that you represent Democrats too- in every district in the state. You can pass lots of Republican legislation but you are morally obliged to allow Democrats to contest that legislation with ballot issues- including Constitutional Amendments. Our state is a purple state. You probably control 54% but you pass far-right legislation that is out-of-sync with more than half of the population and they, as citizens, deserve the chance to reverse this legislation. Having petitioned on several citizen-led ballot issues, I know how difficult it is to just get them on the ballot. To add the additional requirement of a 60% vote means that we don't really have rights. If you are morally and ethically challenged, you probably don't care. But, are you? I hope not.
