

TESTIMONY

To all it may concern:

I am a proponent of HB 248. I, myself, have allergies and carry an EpiPen. Because of these allergies, I am not a candidate for the COVID 19 shot. My son has a rare allergic disorder called Eosinophilic Esophagitis. While he is still only a toddler, I do believe his disease will prevent him from receiving not just the COVID 19 shot, but other vaccines and future medical interventions. Because of this, I believe there needs to be medical freedom for people like us. I do not want to feel like I'm wearing the Scarlett letter because of issues my son and I were born with. Thank you.

I have also attached my Witness Information.

Thank you,
Amanda Citarella-Kordic
