

Attn: Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee

Thank you for the opportunity to provide proponent testimony on House Bill 248. My name is S. Bowman and I'm an analyst at a large corporation in Hudson, Ohio.

On Monday of this week my company posted on the door (see attached) and also informed the employees via email that if they are vaccinated, they no longer have to wear face coverings, but for those who chose to not vaccinate still have to wear face coverings in the office (see attached). While it is on the honor system and you do not have to disclose anything, I am an honest person and do not feel like lying is the answer. The reason I chose not to vaccinate is because I had a terrible reaction to a vaccination. It is not a one stop shop for everyone. The VAERS site indicates there are now over 4,000 reported vaccine related deaths and over 100,000 adverse reactions to this.

I feel COVID-19 has been an entirely created pandemic narrative built on false-positive tests and inflated case counts. A huge portion of the population are not even at risk, and I was informed by my physician that I am not in a risky category. According to the CDC stats, there is over a 99% survival rate. And there is documented, proven successful medication and treatment which is being withheld from doctors and the public. WHY IS THAT?

The CDC continues to manipulate data that indicates this injection's effectiveness, hiding breakthrough cases and blaming the unvaccinated for outbreaks. Where is the study that proves this? Where is the data? Were you aware that there were NO TRIALS? There is no data. In contrast, VAERS studies show that the COVID shots are the likely cause of deaths, spontaneous abortions, cardiovascular, neurological and immunological adverse events. This is causing great and unnecessary harm to innocent people! This is being inaccurately marketed as a vaccine AND does not fit the definition of a vaccine. It is a shot, is harming individuals, and is proving to do nothing to protect those that have taken it.

We are now using celebrities, illegal bribes and peer pressure to force people to comply which is only serving to feed fear and divide our country. When did it become acceptable to ask someone about their personal health choices? When have the vaccinated ever been so fearful of others post vaccination? Why don't they feel protected? Why are people concerned if I'm vaccinated or not if they are vaccinated? Why do we need to point out who is and who is not? This seems like an obvious and deliberate act of deception. We are being treated like those who had to sit in the back of the bus for having a different skin color. What's next – SEGREGATION and forbidden entrance to public places for a virus with a less than one percent fatality rate? Remember that segregation causes resentment, frustration, protests, demonstrations and violence. This was once a peaceful country, and the majority of us would like to keep it that way.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

In freedom,

S Bowman
