

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee,

As an American Citizen I believe my Constitutional rights have been violated by mask and social distancing mandates. The Vaccines are another attempt of taking away our God given rights by intrusive measures of control. This bill will reinforce the protection of our position under God in the State of Ohio. It must be passed to block the invasion of Socialism to weaken our understanding of our Rights under the Constitution. I believe this is part of the full on attack we have been fighting to take down America and dissolve our Constitution. We must be protected from Fear mongers that have used these tactics to divide and conquer Americans for decades. it must be stopped now with the people standing up and reminding government they work for us and we are in control.

Sincerely,

Drinda Dye
