

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Rochelle and I am mom and Pharmacist and the reason I support House Bill 248 is because my private health information is just that, Private. No one has the right to force me to put something in my body that I don't want just so I can travel, shop, leave my house or my kids, to attend school. Whenever there is a risk there must be a choice and especially with this vaccine that has no long term studies. We're already seeing more deaths and injuries with this one vaccine than we've seen with all other vaccines currently on the market in all the years they've been available and no one is looking into it. There needs to be more accountability and less intrusion on our rights.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,

Rochelle Walters
