

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee,

thank you for the opportunity to provide proponent testimony on House Bill 248. My name is Daniel

Chick and I am employed as an Avionics Technician and the reason I support House Bill 248 is because

it will help prevent people like me who refuse the ineffective, unsafe experiment vaccine to be discriminated against.

This vaccine campaign being promoted is equivalent to the big lie theory used in Nazi Germany. According to the vaccine

manufacturers these vaccines don't prevent covid and there are plenty of examples of people getting Covid after taking

the vaccine shots.

According to VAERS reports there have been over 4000 reported deaths caused by the vaccine shots. Also, there's been

reports of blood clotting, people being paralyzed and having nerve damage and many side effects after taking the vaccine.

These vaccines aren't safe.

And they using new technology that hasn't been used before so therefore, anybody who takes the shot are guinea pigs.

And finally, April 30 I donated blood and they gave me a free antibody test. It came back positive. Why would I be

discriminated against when I'm immune from Covid. I get no benefit from taking the shot. I believe the people who

are promoting it are more concerned about the vaccine companies profit margin than the well being of the people.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,

Daniel Chick
