Thank you for providing the opportunity to support HB248. I am former department manager of a Fortune 500 Company, my wife is a former business owner. Please vote for HB248 to eliminate vaccine passports. We feel the passport should be illegal because it forces us to agree to something we do not want and violates our personal freedom. Proponents of abortion often say "My body, my choice. They get a choice, we do not? Also the vaccine passport will force us to buy food and supplies from enormous computer driven companies, damaging local small businesses, who are still trying to recover from the shutdowns.

Thank you for your service and consideration of our point of view.
