

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Darren Loyd and I am full time working dad to three sons. I'm writing to express my full support in HB248.

I believe in medical freedom and the ability for every individual to be able to make the choice on which medical procedures they partake in for themselves and their families. If HB248 is not passed, those rights will be stripped away from Ohio citizens.

I am also strongly against businesses requiring knowledge of my private medical information for myself and my family to be able to enter into or for me to provide for my family. No one outside of my family and our medical provided should the rights to or access to our private medical information. I also have concerns on how that information will be used and stored.

Ohioans should not be forced into taking an experimental, non-FDA approved vaccine in order to participate in society. This is discrimination and unlawful.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,

Darren Loyd
