

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for your interest in HB 248 and the opportunity to speak about the rights of Ohio citizens.

My name is Christina Yeary and I am a stay at home mom to three beautiful, smart, strong children. I am a wife to an amazing husband that provides for our family and the reason that I support House Bill 248 is because I believe in vaccine rights and the freedom to choose what goes inside of my body and families body. My husband has been told by his company, that in order to re-enter his office building, see clients or attend any work event, he must be vaccinated with this experimental "vaccine" for covid. He has a medical exemption, but that just means that they will be able to "accomodate" him by discriminating against him by putting limitations on him and requiring extra restrictions in place while he's working. This is not okay. They will be impeding him from being able to do his job to the fullest potential, therefore harming our family financially. I am also a huge supporter of this bill because I do not want to see mandates on our children in their schools as well as discriminating against them by making them separate

from the vaccinated children or making them wear masks. This vaccine "may" only protect the user and it does not protect another person. People have had the opportunity to get this vaccine if they feel it is deemed appropriate for them. Don't let others suffer because they don't believe this vaccine is a good choice for their family. That is discrimination.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248. The time is Now!

Sincerely,

Christina Yeary
