

*Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.*

*I am a resident of Anderson Twp., in Cincinnati. My name is Nancy Fuller. I am a native of Cincinnati and I have raised my 3 grown sons here. I had a career in Management for 24 years at a multi-billion dollar packaging manufacturer. I am currently semi-retired.*

*The reason I support House Bill 248 is because my family and I are extremely concerned about the health impact the current Covid vaccines will have on our health. My 28 year old son, Stephen, has autism and epilepsy, and after much research I am convinced that his genetics loaded the gun for his condition, but our environment pulled the trigger. The environment would include but is not limited to the 20+ vaccines he had on the compacted childhood vaccine schedule, introduced in the early 1990's.*

*So, with that said, my husband, 2 sons and I are all not comfortable with new to market vaccines, not knowing either the short or long term implications. We feel strongly that we deserve to have the right to choose and not to be discriminated against in public places if we don't get the vaccines.*

*Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.*

*Sincerely,*

*Nancy*
