

My name is Scott Martin and I am an IT Administrator. I support House Bill 248 because I believe that no one should dictate what you do with your own body except yourself. I believe in personal freedoms, not mandates.

When someone mandates a vaccine it is stripping an individual of the ability to decide what is best for themselves. No one should be pressured into getting a vaccine or risk losing their job if they don't.

Thank you for the opportunity to provide testimony on the need for House Bill 248.

Sincerely,

Scott Martin
