

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Claire Fischer I am a hair stylist and mother of 3. The reason I support House Bill 248 is because vaccines effect each person differently. There are numerous, known possible side effects from vaccines. I feel that each person should have a right to choose if they want a vaccine or not. Also, vaccines are against our Catholic beliefs because of the use of aborted fetal tissue in some. The ingredients of the Covid-19 vaccine have not been made public; therefore, we do not know if the aborted fetal tissue is in that vaccine.

My husband has Gillian Barre Syndrome (GBS) an autoimmune disease that effects your nervous system. He was told by his neurologist, not to get any vaccines, due to the fact that vaccines can trigger GBS. My husband could barely walk when he had the initial onset of GBS. He still struggles daily with his legs. It would be very dangerous and scary for him to get the Covid-19 vaccine.

I support medical freedom for all Americans. We need to have the opportunity to choose what is best for ourselves and our children without being told we cannot go to work or school without a vaccine.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,

Claire Fischer
