

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee,

Thank you for the opportunity to provide proponent testimony on House Bill 248. My name is Jennifer Neal and I was a Medical Sales Representative and Area Sales Manager as my career until my retirement at the age of 55. I am a proponent of this HB 248 Bill because I strongly believe the residents of the great state of OH deserve a choice on receiving an EUA, quick to the market, vaccine and it should not be mandated nor made a requirement for employment. I am very aware of all of the research on these vaccines and the great risks and side effects these are causing many Ohioans. Subjecting children to this makes me sick to my stomach. I have never been against vaccines in the past but my research on these 3 available in the US is appalling and very dangerous to anyone who receives it. I have uncovered the aborted fetal cell lines have been used to test and create these vaccines which 100% goes against my Catholic religious beliefs as a pro-life advocate. My entire family will not be taking this vaccine and while we have lived our whole lives in Ohio and would like to continue to live here, I will move to Florida or Texas or another state where their government is not requiring such communist rules if need be. I thank you for taking the time to consider my voice and look forward to the passing of this House Bill as the United States of America needs to remain a "free" country as many fought and died for this in the past to make it this way. Sincerely, Jennifer Neal
