

without a mask. Even if the pandemic were to be declared officially over, UDF will make them wear a mask or lose their job unless they show their papers (vac status). The young girl telling me this wants to become pregnant someday and she does not want to risk her health or that of her future children by taking an emergency use drug. There are zero long-term studies documenting the side effects and every single drug ever made does have side effects. No one knows what can happen down the line. She and the others should not be punished or threatened over their health care decisions. Masks do not stop viruses as written on the CDC and NIH website, yet masks can cause harm. It is not up to private businesses or government to determine what anyone should do with their body without even knowing their personal situation. Unfortunately we can no longer trust government or businesses and therefore, I beg of you to please put a stop to the invasion of medical privacy and discrimination based on medical status whether it be for employment or to enter a public business. Additionally, hospitals and other medical offices should not be allowed to discriminate against the citizens of Ohio with mask mandates and vaccines.
