

My name is Joshua Baldwin and the reason I support House Bill 248 is because I am a Christian who believes in freedom of choice, and should be able to decide what goes into my body based on my faith, and personal convictions. This new vaccine is only available through emergency use and it makes me nervous for potential long term side effects. It's impossible to have this data as the shots are so new and to force people to get it to work, shop, go to school, and other daily life activities goes against our rights.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,
