

My name is Jacob Coburn and I oppose this Bill (HB 248). My father-in-law had polio as a child and has suffered the repercussions of this horrible disease his entire life; vaccines can prevent this occurring to future generations. This is 1 example of the diseases/viruses that vaccines can and have prevented from ravaging our society. Please think of the thousands of citizens that will be negatively impact if this bill is passes.

Thank you,

Jacob Coburn
