

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Steven Darling and I am Security Officer providing armed security for a government agency and the reason I support House Bill 248 is because I am an American with Constitutional Rights!

Mandating vaccines is a violation of the the 4<sup>th</sup> Amendment: " The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches, seizures shall not be infringed" The autonomy of my body is certainly protected by this right! I have a right to my own religious beliefs which do not include being injected with with foreign substances. I have a medical condition that includes a greatly increased risk of blood clotting. Any substance that could increase the risk of blood clotting, could prove deadly to me. I have the right to decide what medical treatment I receive (including an experimental vaccine with no long term testing that has already caused the death of the thousands, and the serious injury of hundreds of thousands per: (CDC Vaers adverse vaccine reporting).

My employer has said that they intend to make this Covid19 vaccine mandatory as a condition of employment. If this Bill is not passed I will lose my employment.. soon. I have worked hard to put myself in the position I am in, and it would be devastating to have to start over, but I will not take this vaccine under any circumstances!

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,
