

Good morning! We don't want amendments, we want the bill passed as written. EVERYONE SHOULD HAVE THE RIGHT TO CHOOSE WHAT IS PUT IN THEIR BODY, PERIOD! People want vaccines to protect themselves, yet those of us against a vaccine and all its possible side affects want to protect ourselves AND OUR children from the VACCINE. THANK YOU for listening to the people and taking steps to PRESERVE OUR FREEDOM!!

1. Our right to choose. My body, my choice.
2. To PROTECT ourselves and our children
3. Freedom that our ancestors died for
4. My husband had adverse side affects from reg vaccines as a child
5. Horrifying Discrimination (especially among children in schools) and causing extreme division in our country
6. We don't force anyone NOT to take the vaccine, we should be treated with the same respect we treat those who want the vaccine
7. This virus is not the Spanish flu. Then it might be understandable
8. People's jobs will be at risk and hospitals will lose staff if this bill is not passed
9. Let each one choose their own risk, to face the virus or to take the vaccine
10. We as a family of 5 and hundreds of people that we know, are naturally immune and it was not worse, or in many cases, not even as bad as the flu
11. 99% survival rate does not justify the side affects of a vaccine that does not have nearly enough testing and is not yet approved by the FDA
12. Causes fear in children and psychological damage and is created in the schools if enforced to be vaccinated or carry a card
