

Hello,

I am a lifelong diabetic and my diabetes was a result of the Hepatitis A and B being inserted into my vaccines at the age of 6. I have had it for 40 years and it has almost killed me. My two children are both vaccine injured. One with a calcivirus and the other with Hepatitis A in her liver, gallbladder and her thyroid. We are spending a ton of money trying to heal from our vaccine injuries and cannot afford any additional trauma to our family. Emotionally or financially.

Please do not make Vaccination's mandatory. It makes zero sense. Especially since there is Ivermectin, HCQ and there is a 99% survival rate. There are so many natural cures also...

Thank you!

Amber Lansford
