

HB248

Aug. 18, 2021

Hello,

My name is Keith Morgan, I'm an LPN and I work in home care as an Independent Provider. I've been a nurse for approx. 23 years. I've also been HIV positive for 27 years and I've been undetectable for over 20 years. I take very good care of my health through exercise and diet. There's a possibility the vaccine could have an adverse affect with my HIV status even though I'm healthy. With a disease like Covid- 19 you protect the vulnerable citizens , you can't mandate that the entire population be required to take an unproven vaccine. If you're a heathy person Covid-19 causes very few issues. Protect the vulnerable groups not the healthy groups. We still have a constitution and freedom of movement and freedom of choice. I am against and vaccine mandates in the state of Ohio...

Thank you,

Keith Morgan
