

Committee: Health

Chair: P. Scott Lipps

Subject: Ohio House Bill 248: Vaccine Choice & Anti-Discrimination Act Testimony

Dear Mr. Lipps:

First and foremost is that I believe in God. I am a firm believer that you do not put something in your body that you know has killed people and made many sick (based on data provided on the VAERS government website). I do not and have never taken any experimental drugs, illegal drugs, smoked tabaco products or drink alcohol. I like it that God wants you to choose what is good for you and your body. I do not try to force my beliefs on others. If they do want to take drugs or alcohol products, that is up to them. I did get the Covid 19 virus and came out just fine.

I believe that, as a Christian, it is my body, my choice.

Thanks for taking this testimony into account.

Mark Madger
