

Committee: Health

Chair: P. Scott Lipps

Subject: Ohio House Bill 248: Vaccine Choice & Anti-Discrimination Act

Dear Mr. Lipps:

I am a Christian and believe in God. I only put into my body the healthiest things I can. I believe in conventional medicine and homeopathic medicine and combine both to help me be as healthy as possible. I believe that taking an experimental drug is risky and I am a very sensitive person to anything so I always wait before I take anything new even when fully FDA approved. I am not an anti vaxxer however my body overreacts to most anything even Advil so I have to be very careful. I did get the Covid 19 virus last year and breezed through it (thankfully). According to statistics most people survive (thankfully).

I believe it is my body, my choice. I also believe that anything medical is between my doctor and me.

Thank you.

Sharon Madger
