

August 18, 2021

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on House Bill 248.

My name is Michael Murray and I am the owner of a small family business which barely survived 2020. I support House Bill 248 because I believe in the free choice of each individual to be responsible for their personal medical decisions. No government has the right to mandate and force medical procedures or drugs on any person. Josef Mengele was given this power by the ruling political party of Germany at the Auschwitz concentration camp. This is a horror. This power is not for any government to wield over its citizens...especially with an experimental drug....which is **not** a “*vaccine*”! If I choose to get a flu or tetanus shot, that is my decision. If I choose not to, that also is my decision and no one elses!

Personally, I have two daughter-in-laws that are pregnant and both are due to deliver in October and then breast-feed into the new year. It is unthinkable that an untested shot approved for “emergency use” will be injected into them, and therefore their babies, with unknown outcomes. This must not be allowed.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,
Michael Murray
