

Chairman Lipps, Vice Chair Holmes, Ranking Member Russo, and Members of the House Health Committee, thank you for the opportunity to provide proponent testimony on Ohio House Bill 248.

My name is Daniel Gutuescu and I am a Design Mechanical Engineer and the reasons I support House Bill 248 is because:

- It is in line with unalienable human rights we are born with,
- In line with the Nuremberg code,
- It does prevent abusive treatment of citizens by despotic governments or other organizations/entities,
- Prevents illegal, inhuman, unacceptable discrimination against groups of people that value their family and fellow citizen's freedoms, the sanctity of their body and spirit.

It is regrettable that society needs a House Bill to respect the irrefutable, indisputable, undeniable rights of its members. The content of this injection and/or any reasons some people may decide to take it, are absolutely irrelevant.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Sincerely,

Daniel Gutuescu
