

Attn: Health Committee

I am writing to you today as a very concerned mother of a daughter in nursing school. She is young and healthy and does not want to be forced to take an unproven vaccine. She has several nurses that she works with that have had severe reactions to their vaccines and ended up hospitalized. She is scared to death to have to get this. She has one year of school left and works as a pca at a local hospital. She has a heart of gold and will be great in the profession given the chance. She feels like she is being forced to give up all of her hard work and choose another profession or go against all of her moral and ethical beliefs as well as put her own health in risk. We live in a country where we have freedoms to believe what we want, choose what is right for ourselves and our health. This should not change because people are scared. Science tells us that it's a virus, a virus doesn't disappear, it mutates and changed constantly, and when you go to the doctor when you are sick with a virus, they tell you "it's a virus there is nothing we can do for it. It has to run its course" I beg you to please vote for HB 248 to protect our youth as well as anyone who chooses to make their own decisions for their own healthcare. It is imperative that this legislation passes for our future.
