To Whom It May Concern:

I want to start this by re stating, as my witness form states, it is not the governments job to protect my health. It is the governments job to protect my rights. It is my job to protect my health. When you start trading liberty for safety, you end up losing both.

We have family and friends who are being threatened to lose their jobs. Years of hard work to get into their professions, they were exhausted during the initial hit of this so called pandemic and now, its so bad again, that they are expendable if they don't comply. All because some random stranger in power believes in the vaccine, believes the propaganda, they get to mandate and decide that for you? What happens when the tables are turned? Choice is so important in a free society, without choice you begin to take away freedoms.

We as Americans need to stand together for our rights, our children's rights and the future of this country.

Grateful for your time,

Sarah Morrow
