

Good Day, my name is Andrea Simpson & this is my testimony on HB248, in which I am in favor. I personally feel that Government & Medicine should not mix. The thought of someone else making a person put anything into their body is just out right wrong! A person is able to determine on their own judgment , what type of treatment, medication, medical procedure & a flu like vaccine that they will have. I back science, but a lot of the science has been rushed in this covid19 shot. Although it was invented in the late 80's by Dr Robert Malone , in that even he has his own concern of that type of vaccine being used at this time due to not enough data being researched on possible side effects . I find it suspicious that his post had been blocked & taken down , claiming to be false info... I would think that he should know about mnra, since he was the one who created it! So does that also mean that the Freedom of Speech, especially of the truth is truly gone. There is going to be people who do well with the vaccine & others who won't, just like with getting Covi19. You never know how you will react in anything. There have been many side affects with this vaccine but yet those don't seem to be made public. There' also a lot of people having issues (that I know) but yet their new medical issues are never researched for an explanation of it possibly being linked to the vaccine, but I ask, why now? They were perfectly fine before. I also feel that threatening people to not be allowed to hold a job or go to a restaurant or store with a "passport" is so wrong on all levels. I'm sure all of you know your History, so you may want to truly reflect on that. This Country was founded on Freedom, many men including most of our families have fought for this Country, whether it was for our Freedom or to help another gain theirs. I wish I could say that this was just about a new Vaccine, but I feel there is more than meets the eye! Never give up your personal decision on anything in life, let alone to someone who does not have the same beliefs & standards or people who would "Bully" their authority around . Thankyou for your time
