

My name is Mark Ladd and I am a non-clinical Program Director at a Large Hospital System in Ohio and the reason I support House Bill 248 is because is that I feel all people should have the right of informed consent and a choice of how they will care for themselves. We express how important shared medical decision making is when developing plans of care with patients.

These mRNA Vaccines are permitted under Emergency Authorization and some evidence suggests that these vaccines are having some significant adverse reactions. There has been very little transparency, no public peer review of the vaccines, and getting to the facts is extremely difficult for the average person to obtain. Unvaccinated people have been vilified and are under constant pressure and coercion to receive the vaccine.

VAERS Reporting System Data through Aug 8, 2021

- 571,830 Total Reports of adverse effects
- DEATHS: 12,791
- 4.2 million children positive for covid.
- 0.008% (336) have died. 2018/2019 Flu season 480 children died from the flu. No vaccine mandates for Flu.
- 291 children ages 0 – 17 seriously affected or died from the vaccine. (VEARS)

The choice to receive the vaccine should be an individual choice and this choice should be private and respected.

Thank you once again for this opportunity to provide testimony on the need for and urgency of House Bill 248.

Kind regards,

Mark
