Re: HB 118  
SB 52

Dear Senators and Congressmen:

Please oppose HB 118 and SB 52.

HB 118 and SB 52 require "local approval" of solar and wind farms that are NOT required by natural gas power plants. With the current climate crisis, Ohio should be doing all it can to INCREASE renewable sources of energy. Renewables, like solar and wind, will provide new employment opportunities for Ohioans, decrease global warming trends and should not be subjected to regulations that do not apply to other power generators.

Sincerely,  
Marcie Groesbeck, MD
