

Thank you to the chair and distinguished members of the Public Utilities Committee.

I support HB 450, Today I offer proponent testimony for HB 450.

Two years ago I put 10 kWh solar on my roof.

Community solar will help us make solar assessable and equitable for all. We want to put solar on in vacant lots, parking lots, parks, and on community buildings so our neighbors can all participate and receive that energy. We want to use our own dollar to buy into the future of Ohio's energy system, and generate local clean energy.

Please don't water the legislation down, or stop it all together.
