

Peel County in Ontario, Canada sparked international outrage as it was discovered that children were being quarantined alone for two weeks at a time, their meals placed outside their doors, with not even their pets allowed to be with them. A Mom posted on social media that she couldn't bear the crying of her 10 year old on the other side of the door begging for her Mother because she was lonely.

The government had to make a statement to do damage control. Those exact same rules are still posted on Ohio's official coronavirus website as rules to be followed for quarantine. This may have been done to children in the state of Ohio more than once in the last year. The Geneva Convention states that solitary confinement beyond 15 day is considered torture and is criminal. And yet we are doing this again and again to school children. This reign of terror needs to end and never happen again. This state of emergency needs to end immediately. I am currently working on a commercial of a child screaming from behind a bedroom door with the Ohio quarantine rules displayed over it so I can post it on social media and try to make Ohio international news too, but I'd rather that our legislature just do the right thing and represent us. Not 90 days from now, not 30 days from now, we need this state of emergency to end now.
