

Our State of Ohio does not have to be a subject to a corrupt federal government that wants to take away the rights of US citizens that are given in the amendments to our constitution. The chief about these rights is the 2nd amendment. This right was not given with self protection in mind - our founding fathers were not that stupid. It also was not given with hunting in mind - again, our founding fathers were not that stupid. Our second amendment was given to enable us to take our country back from a corrupt government - our founding fathers knew that this day would come. If the 2nd amendment falls, then all of our other rights in the bill of rights will also fall. Our current president has said that no amendment right is absolute. I close by saying this. No armed people will ever go willingly to be loaded on to railroad box cars. Let that sink in!
