

Please vote NO on House Bill 322.

The Ohio Legislature has no business forbidding educators' speech.

I want my children to learn evidence-based history and social studies in school. This includes studying the history of racial discrimination in our country and topics such as red-lining, which still impact communities today. Only by studying these topics can they understand the world they live in.

I want my children to become well-informed citizens, who make their judgments based on facts, not censored, prettified versions of history.

I oppose this bill.

Thank you,  
Danielle Fosler-Lussier
