

Chairman Wingman, Vice Chairwoman John, Ranking Member Kelly, and Members of the Committee, I want to thank you for this opportunity for me to share why I am asking for all of this committee to please support HJR1:

My name is Desiree J. Moore. I am a resident from Coal Grove, Ohio, in House District 90 - My House representative is Brian Baldrige. I am a 27-year-old home health aide.

I feel the reason why I support this bill is straightforward.

First and most importantly, I love my country, and I believe in the values our founding fathers fought for us. I believe in the ideals, morals, and principles our country was founded on. I'm also tired of our elected officials not doing what we put them in office to do, especially when most Congress members have been in office longer than I have been alive. I also feel after they get elected, they only want to make their party happy and not on what all their constituents want. They've forgotten who they work for.

Every one of them has it in their heads once they get to Washington, they do what they want. Protect themselves from the bills they create. The overreaching control they attempt to inflict on the American people especially with the taxes, the vaccine mandates, etc.

Thank you

Desiree J. Moore
