

I'm now Coming up on my fourth (4) year hosting with airbnb and over 216 guest have stayed in my home and visited the area to spend fiat currency in the area. Reason I began to host was my wife divorced me and stuck me with all debit, 1245 dollar house payment. If it wasn't for the airbnb platform I would have lost my home four(4) years ago. I currently bring business/fiat currency to my town and taxes are payed to the counties bed tax. Im also a unemployed disabled veteran who served this country for 5.7 years and currently because of the covid injection mandate Im unable to obtain employment because I don't have a covid injection for employment here in home of the brave Free America, I and the population here in Free America are Stuck in 1984.

During covid crisis 2yrs ago, the State of Ohio's government, you Ohio law makers didn't give me one cent during my struggles to pay my bills like the Ohio government payed corporate welfare bills for drug companies with covid money.

Fact is if Ohio government takes away airbnb, which is a platform for renting homes and a avenue to generating revenue. I tell ya fact, 100% if Ohio government shuts my rental income, I may go as far as stop paying my mortgage. If given the opportunity I will speak will our Ohio lobbyist law makers about this subject. Thank you for the opportunity to voice my opinion and facts about this subject. Please use my statement as evidence of real life to our elected officials pertaining to HB563.

Sincerely,
Chad Ricketts
