

We are part of the AirB&B community that makes accommodations available to people who need short term accommodations. We are retired and offering this service as a source of supplemental income. Our guest suite provides an alternative accommodation for guests, and benefits our community with healthy tourism. Your support of this bill would have a positive impact on our household as well as others who provide this service. We have also used AirB&Bs in our travels and appreciate the service. This service is a blessing to the consumer because there are more options from which they can choose and helps hold prices down.

Sincerely,  
Daniel Giles
