

PROPONENT TESTIMONY – SB 52
Senate Energy and Public Utilities Committee
Karen and Steven Aichholz
Seneca County
3/9/2021

Chairman Peterson, Vice Chair Schuring, Ranking Member Williams and members of the Committee. Our names are Karen and Steven Aichholz, and we reside in Seneca County. We are writing this letter in support of SB 52 which would allow a referendum in affected townships on large wind farms.

We have witnessed the proposed industrial wind turbine projects divide our community. The overwhelming majority is in opposition, but they have little to no voice over the siting and approval of the projects. The Commissioners, local school board, park district, local airport, many local Township Trustees, and residents have opposed these projects, yet they continue to progress forward. How can this be? It is possible because their voice goes largely ignored. SB 52 goes a long way at giving these people substantive voices in the process.

We acknowledge that many communities across Ohio will be accepting of wind and solar projects however, some communities are not. Only the local community can decide what is best. They have ideas and plans in place for the future of their area and not having a voice in the current process only undermines this. It is critical that SB 52 get passed to ensure ALL Ohioans have a seat at the table in these massively transformative projects. Again, please help our community start to heal by ensuring that EVERY resident has their voice and concerns heard.

Thank You

Karen & Steven Aichholz
