

I strongly urge you to reconsider SB52. The bill puts onerous regulations on job-producing wind and solar projects, effectively killing

investment in these important renewable projects. Ohio should be making it MORE attractive to investors seeking to bring these

kinds of jobs to the state, not less. I agree with State Senator Matt Dolan (R) and State Rep. Laura Lanese (R) in opposing this bill.

As Rep. Lanese put it, "It's an added level of bureaucracy to companies that want to settle here." Since when did the Republicans

become the party of more regulations? I live in a Republican district (Powell, OH) and can assure you there is much support for

growing Ohio's renewable economy, not shrinking it.,as SB52 will surely do.
