

I am writing to encourage you to please oppose SB 52.

It's not fair that this bill subjects ONLY wind and solar projects to a new layer of government regulation in addition to the state process. Ohio must move away from fossil fuel and nuclear energy for the environmental safety of all its citizens. We Ohioans have been greatly increasing our support of wind and solar energy. I myself am using an electric power company that uses only alternative power sources. SB 52 will put Solar and wind energy out of our reach! SB 52 will also put Ohio further behind in the transition to a clean energy economy. It will also greatly decrease general business opportunities within our state.

Please vote NO on SB 52 because it is a clean energy investment and jobs killer!
